Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 8 and 12 pertain to methods for evaluating fetal functions and/or placental functions. However, the description does not indicate what types of evaluations are intended by the disclosures in question, and does not indicate what manner these evaluations will be carried out in; therefore, the disclosures in question cannot be considered to be fully supported by the description.
